I. RESPONSE TO RESTRICTION REQUIREMENT

The election/restriction requirement under PCT Rule 13.1 states that the present application claims more than one invention. The inventions are described as follows:

Group I (Claims 1-4), drawn to a method of treatment glaucoma by administering a composition comprising at least one cathepsin K antagonist; and

Group II (Claims 5-8), drawn to a composition comprising at least one cathepsin K antagonist.

Applicants are required to elect a single invention to which the claims shall be restricted.

For purposes of fully responding to the election/restriction requirement, Applicants elect the invention described in Group I, that is, claims 1-4.

The Restriction Requirement further states that the claims are directed to more than one species of the generic invention. Applicants are required to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. For purposes of fully responding to the election/restriction requirement, Applicants elect the species SB 331750, listed in claim 2.

Applicants reserve the right to request rejoinder of all species upon allowance of a generic claim and/or to pursue claims directed to the non-elected inventions and embodiments at a later time.
